Arbortext processing instructions

Arbortext Editor defines its own processing instructions (PIs), most of which can be formatted to one degree or another with FOSI, as discussed in the following sections.

NOTE: PIs specific to other products are preserved but not recognized by Arbortext Editor and FOSI formatting.

▷ Introduction, page 680
▷ Stylesheet-related processing instructions, page 680
▷ T$_E$X-related processing instructions, page 682
▷ Touchup processing instructions, page 685
▷ Link and target processing instructions, page 707
▷ User-defined tag processing instructions, page 710
▷ Internal user-defined tags, page 713
▷ Pseudo-attributes, page 718
▷ Processing instruction-related ACL, page 721
