## Solution Management Director - SLM

Wednesday, June 17, 2015

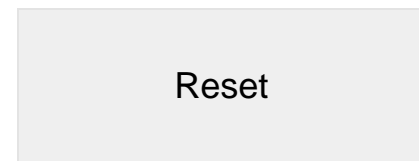

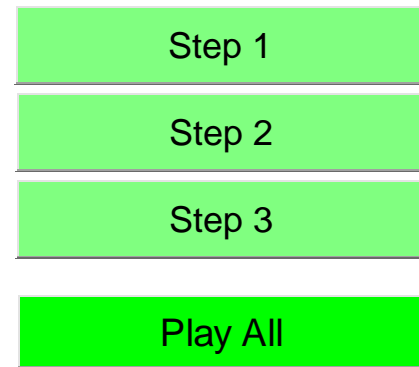

Types of interaction

- Basic clickable image
- 2D parts list as SVG
- 3D parts list with automatic list
- Video output

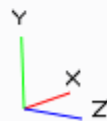

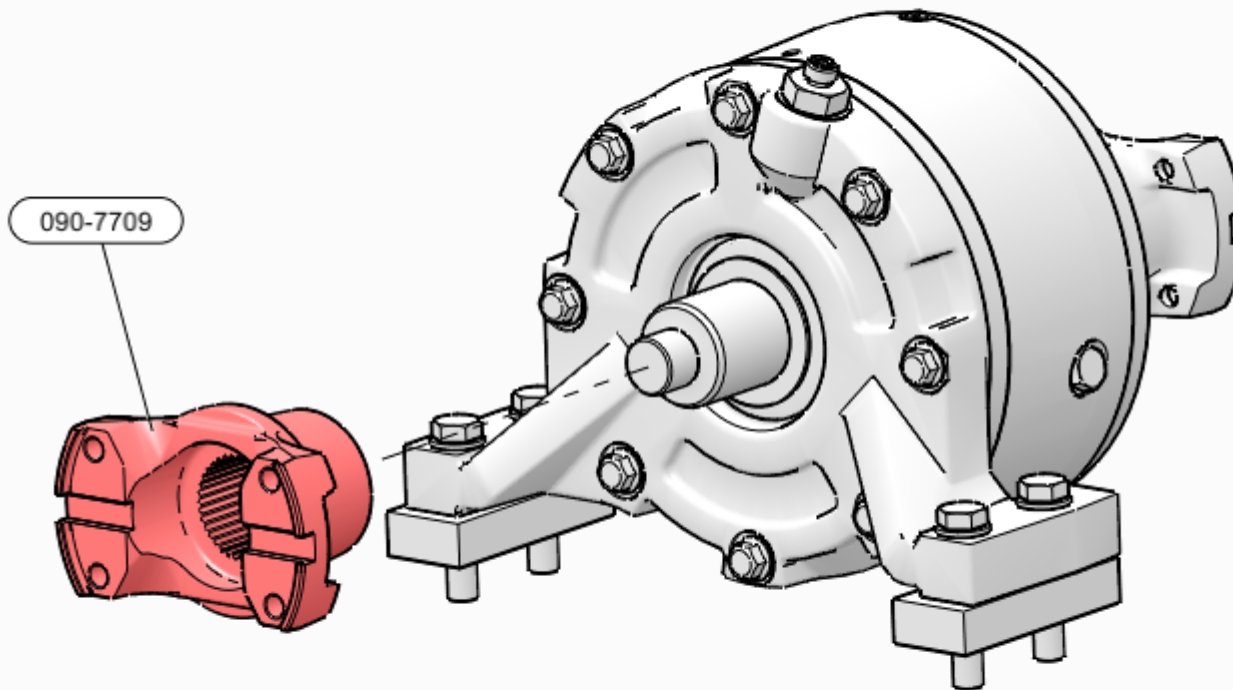

- Multiple steps in a single figure
- Interaction lets you play them in any order or repeat a step as needed.

## Remove Rear Yoke Assembly

Step 3  
Remove Yoke

Q&A

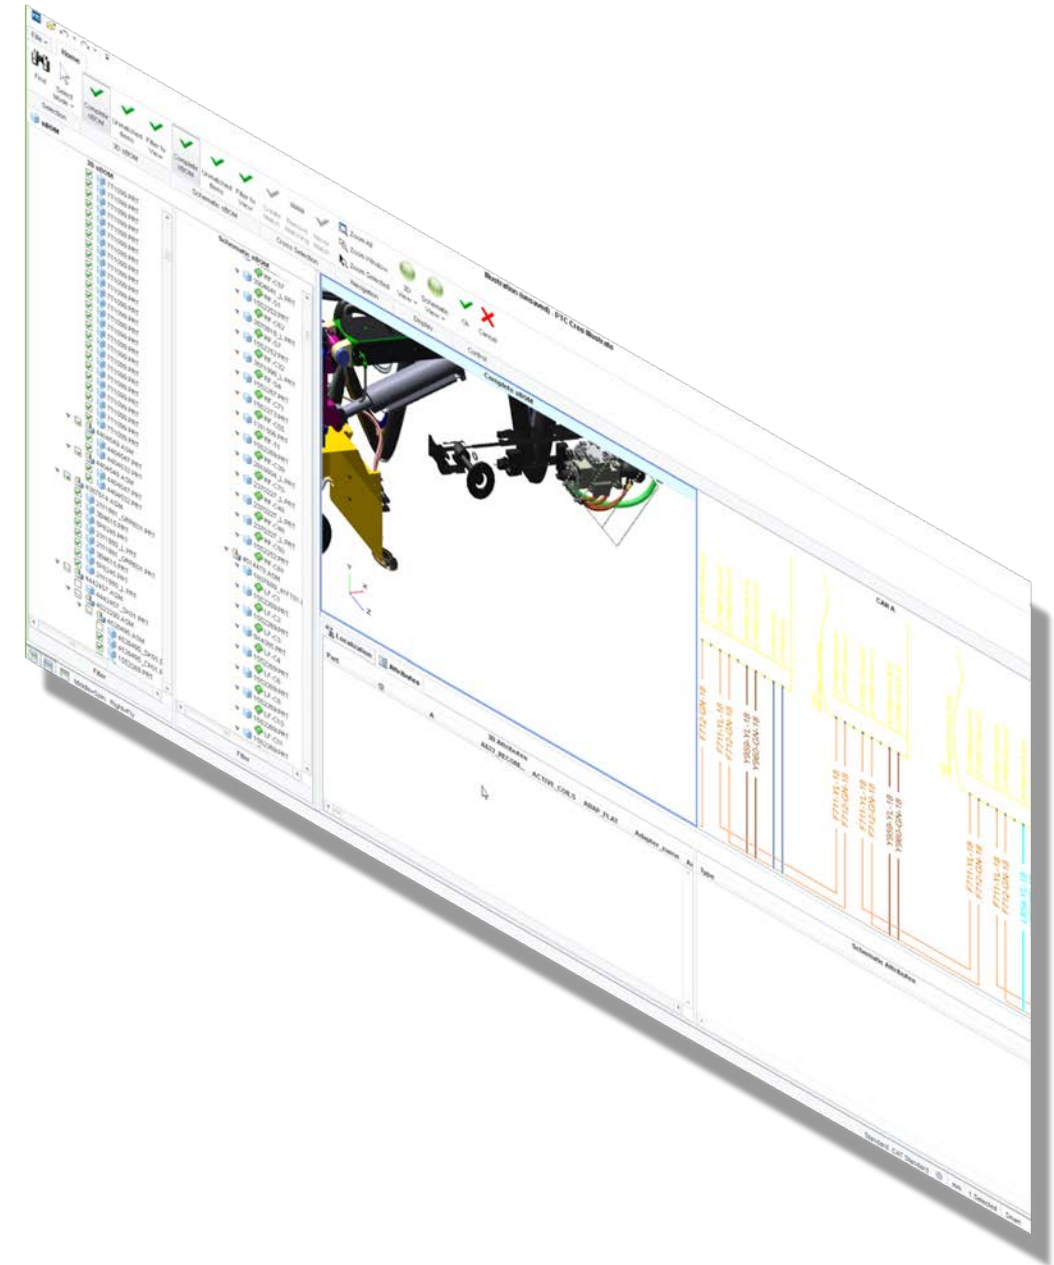

- Support for applicability rules when publishing illustrations
- Improved the structure of SVG files. Added support for hotspots.
- Ability to configure the sBOM tree display
- **Figure Publishing**
  - Publishing of selected figures
  - Enable publishing to multiple file formats at one time
  - User control for enhanced intersections when publishing to 2D formats with HLR
  - Enable a publish operation to be cancelled

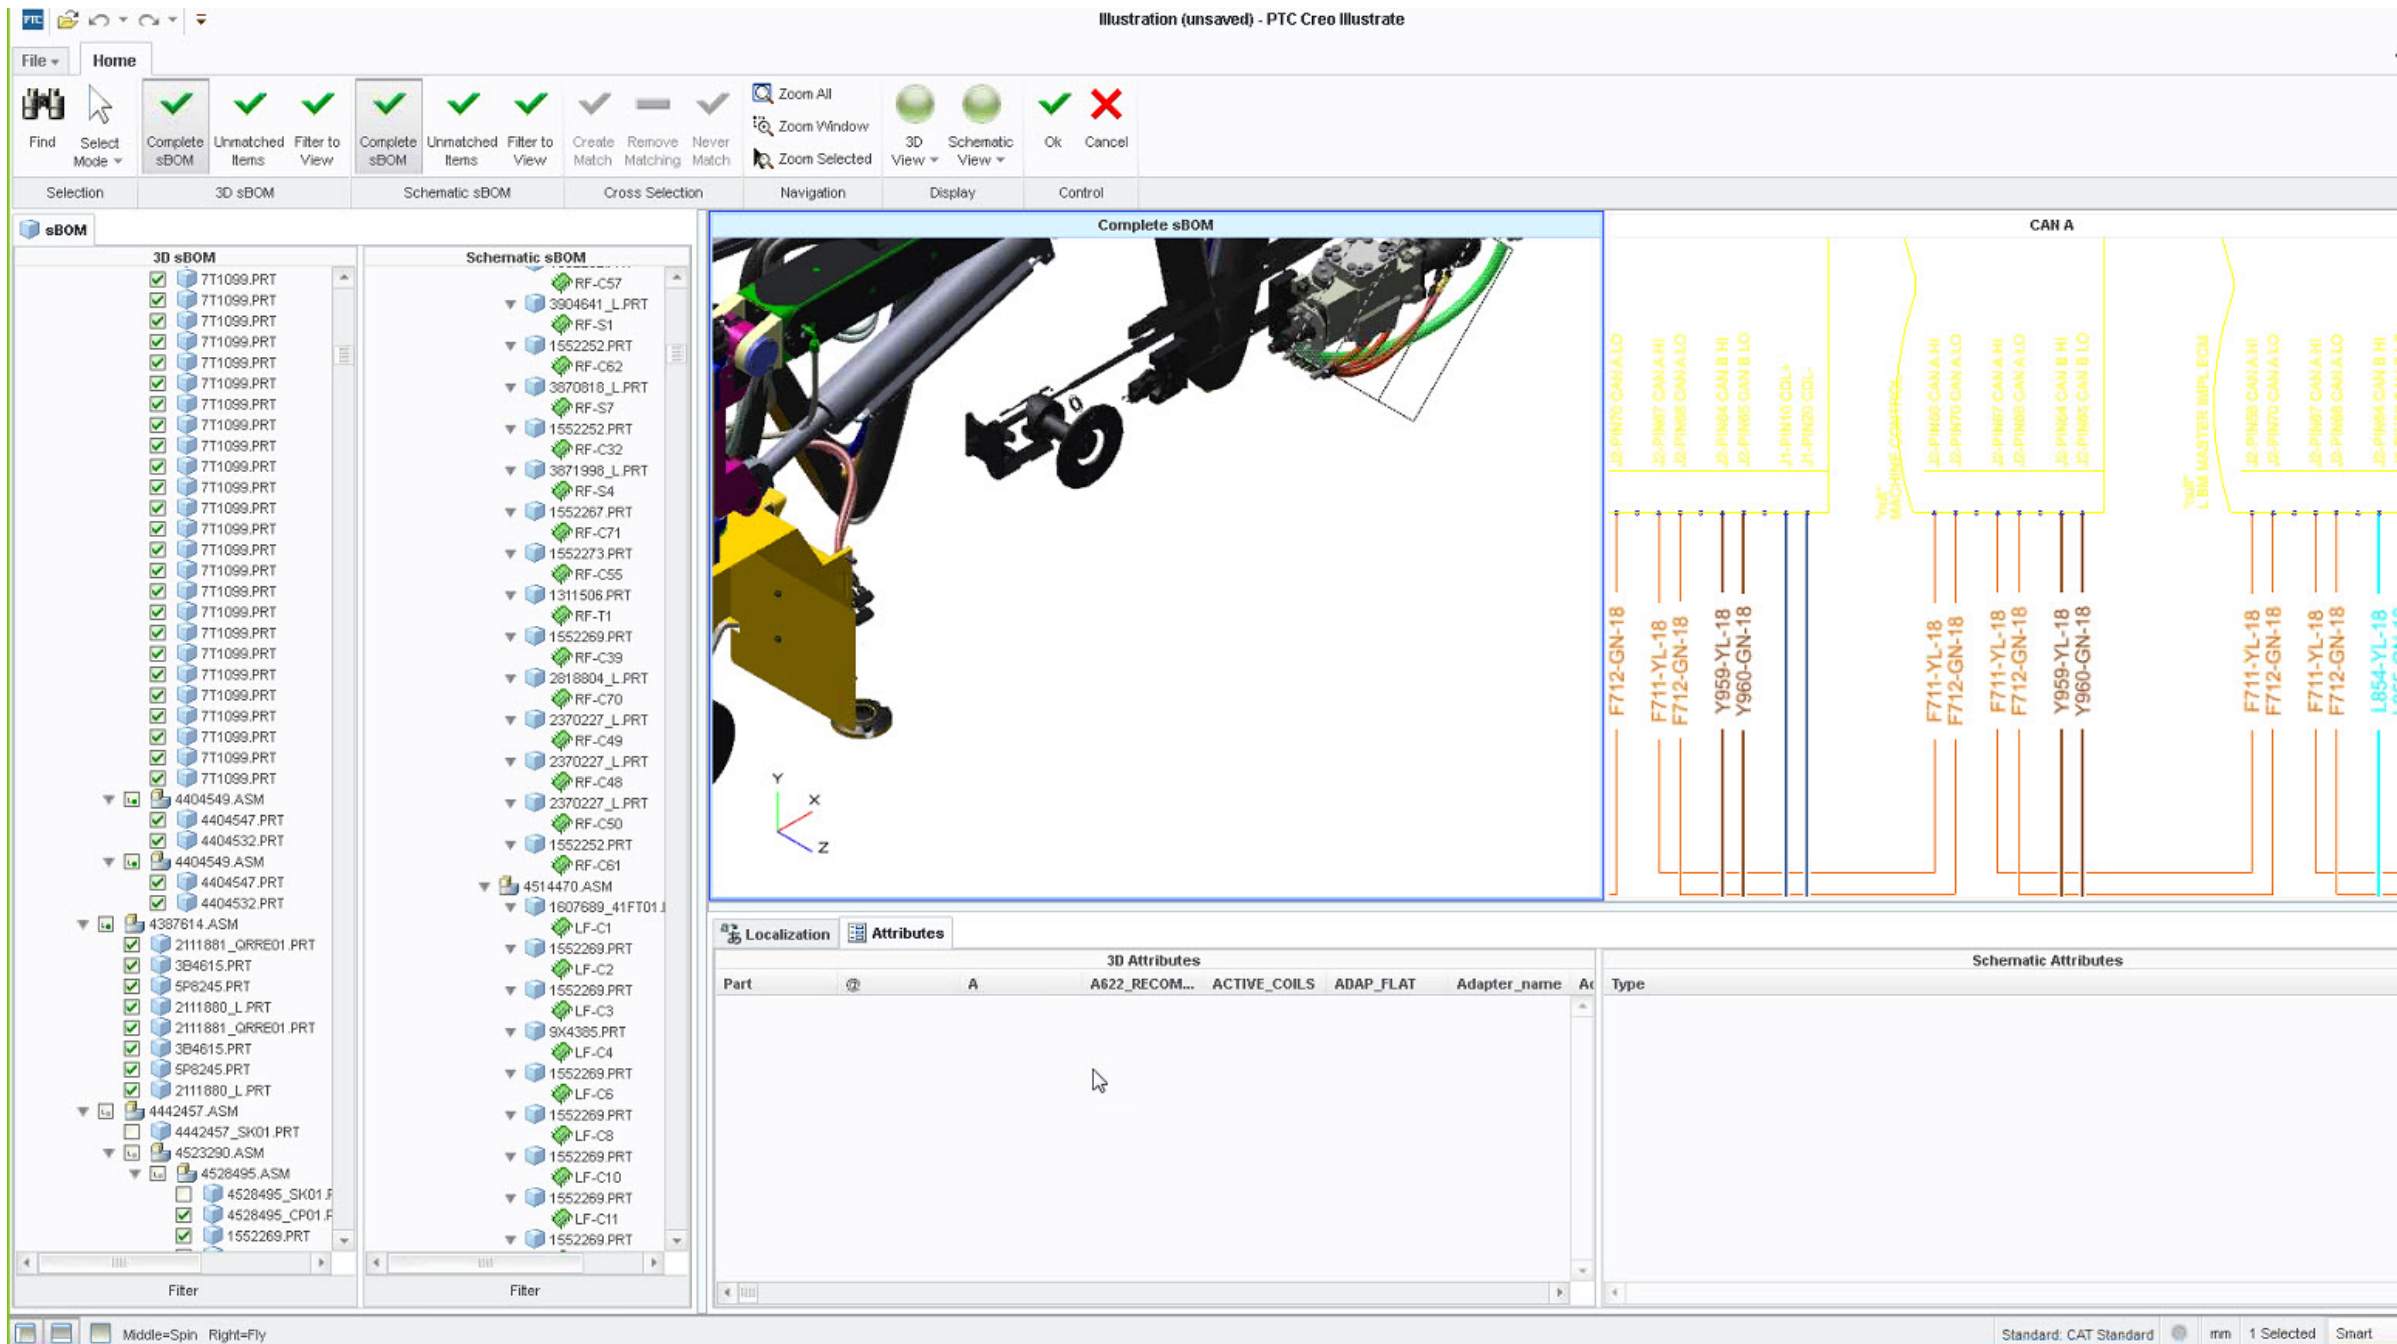

A new optional module to enable illustration of schematic diagrams and cross linking to 3D illustrations

- This new optional module of Creo Illustrate will enable repurposing engineering schematic diagrams from Creo Schematics for use in downstream interactive publications.
- Schematic wires and components can be automatically styled and colored for easier readability, for example based on signal or circuit type. 3D models of the same systems can then be cross linked for intelligent navigation between the logical and physical views of the data.
- Illustrated schematic figures can also be profiled to display the data in different styles for different contexts, for example the display might be toggled to show logical or physical wire colors.

A new optional module to enable illustration of schematic diagrams and cross linking to 3D illustrations
