

This is a Prime 3.0 worksheet. On the documents tab I've selected ledger/tabloid 11" X 17", landscape orientation. This is a text block, designed to be full width the page.

$$F(x) := 2 \cdot (x^2 + 3 \cdot \ln(x))$$

The other option is to change the size of the math using the Math Formatting tab

bigger:

$$F(x) := 2 \cdot (x^2 + 3 \cdot \ln(x))$$

smaller

$$F(x) := 2 \cdot (x^2 + 3 \cdot \ln(x))$$
