

Export Documents Content

I. Objective

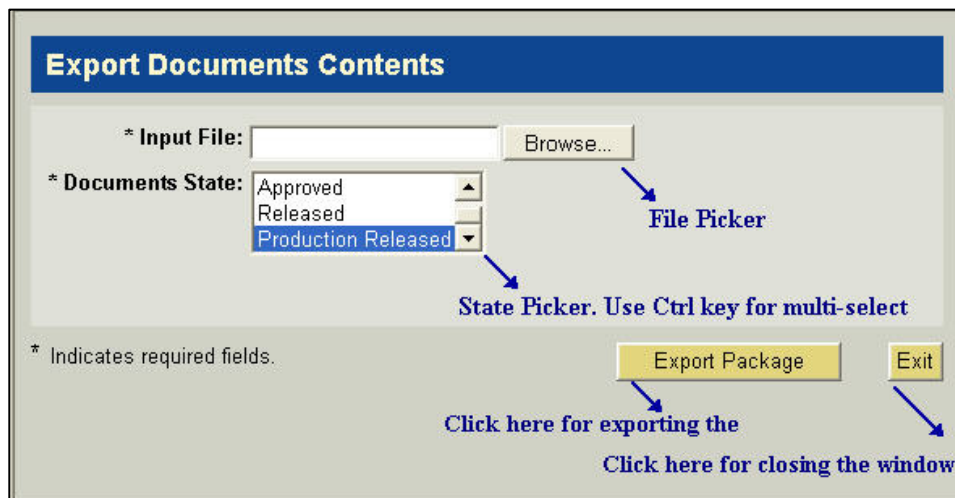

1. Retrieving the documents based on a flat file and lifecycle states
2. For exporting the documents contents as a zip package.

II. Functional Details

1. A sub-menu “Export Package” appears under Home Menu

2. Click-On Explort Package pops up a window for uploading a file and selecting one to many states. The flat file should have “,” as delimiter(doc number,rev)

3. Click-On Export Package exports the documents content as a zip file and allows user for saving the zip file
