## Windchill Logout/Login Brower Setup Instructions

## **Purpose**

When testing or running through scenarios you may need to log into Windchill as multiple users. For example, the Change Management process has three or more roles involved with processing complete changes (e.g. Problem Report, Change Request, and Change Notice). Therefore, you will need to logout and login as different users as you do the steps/tasks associated with a complete change.

The following browser instructions provide a way for you to easily logout and login as another user, without exiting existing browser windows.

## **Firefox Instructions**

1. Create a new bookmark by right clicking below the URL field and selecting "New Bookmark".
