

Smart anti snore mat

- Couldn't sleep last night because your partner was snoring?
- Tried everything but nothing worked?
- Here is the solution: The Smart Anti Snore Mat!

This is how it works:

- Place the mat on your mattress under your sheets
- The built in microphone will recognize when you begin to snore
- The mat will send little electrical impulses that don't wake you up but that will make you move the position

The mat also provides additional value:

- The sleep monitoring system will record your sleep – how many times you move
- Additional sensors can measure your breathing and give a more complete picture of your sleep-quality

Smart anti snore mat SCP Stack
